1.1 Dashboard - BMEU .....	1
1.2 Commercial Plus Pricing – Postage Calculation.....	1
<b>2. ELECTRONIC DATA EXCHANGE.....</b>	<b>1</b>
2.1 Mail.dat.....	1
<b>3. REPORTS .....</b>	<b>1</b>

*PostalOne!* Release 38.1.0.1 deployed on August 26, 2014 to introduce software fixes to the system. This includes corrections to issues previously identified from a prior release. .

## 1. *PostalOne!* System

### 1.1 Dashboard - BMEU

A postage statement for Bound Printed Matter (BPM) that is entered and later saved in Incomplete (INC) status can now be finalized in the *PostalOne!* Dashboard system by the Business Mail Entry personnel. Previously a timestamp error prevented postage statement finalization. 4928

### 1.2 Commercial Plus Pricing – Postage Calculation

With this release, Business Mail Entry Units (BMEUs) can no longer define the Commercial Plus Pricing and the line items on the postage statement that were eligible for Commercial Plus Pricing. However, BMEU can still see the Price Type - Commercial Plus on second screen. In order to ensure the precise calculation of postage for mailers who receive Commercial Plus Pricing using Postal Wizard or hard copy postage statements, BMEUs have been advised to not finalize the postage statement/mailing in the *PostalOne!* System until notified the issue is resolved. 4915

## 2. Electronic Data Exchange

### 2.1 Mail.dat

eDoc submission of Mail.dat 14.1 and 14.2 .sfr record that when populated with the corresponding Service Type code, Service Type A and DP respectively, will now generate Part S, Extra Services line S25 on 3600PM Fee (a per piece pound rate of \$0.20 for Zone 5 -9 Only). 4911

*PostalOne!* is throwing error code 7106 and 7108, when the Intelligent Mail (IM) Container or IM Tray Barcode field in the .csm Label is not unique within the submitted job and amongst all physical pallets associated to the eDoc Sender CRID in the .seg file that were finalized within the last 45 days of the Postage Statement Mailing Date. This was because the system is comparing all containers from the job instead of just those from the current submission. This error has been corrected as of August 25, 2014. 4929

## 3. Reports

Mailers can now access the **Mailer Scorecard** which now populates monthly aggregates of 13 months of historical data. Previously the monthly aggregate only populated with 45 days of historical data. 4938

The **Mail Quality Detail Error** report has been updated to correct a performance issue that prevented the data for the report from being loaded and the mailer from accessing the report. The report now displays without a timeout interruption. 4924

**NOTE:** If you have any questions or need any assistance regarding the *PostalOne!*® system please contact our *PostalOne!*® Help Desk at **1 – 800 – 522 – 9085**
